CPYRGHT

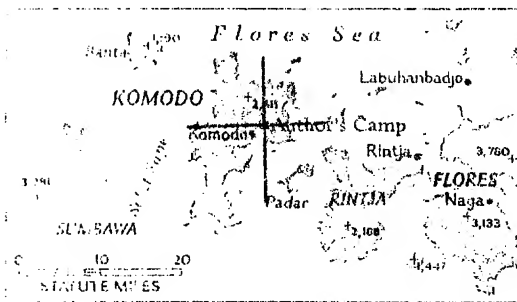

876). About a thousand of the lizards—largest in the world—survive on four tropical islands: Komodo, Rintja, Padar, and the southwestern corner of Flores. Hoping to save *Varanus komodoensis* from extinction, the Indonesian Government has proclaimed part of Rintja a dragon sanctuary and has restricted export of the giants.

CPYRGHT

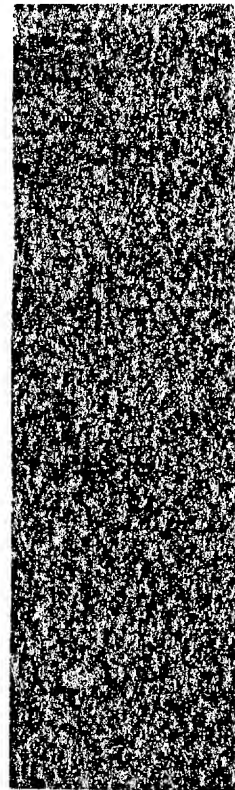

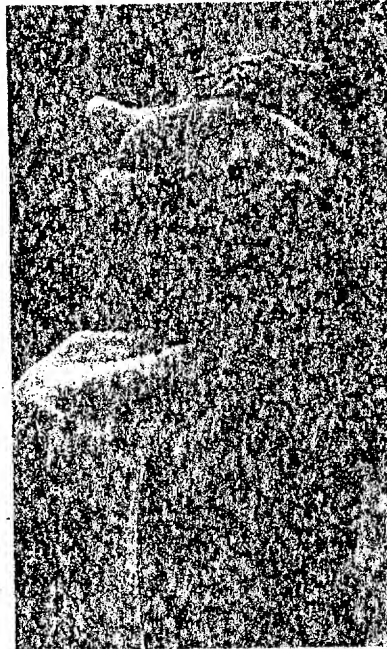

Lizards of Komodo

Realm of the dragons: Green tone shows the giant lizards' tiny kingdom.

Gleam of gold on the hide of a newly hatched Komodo dims with maturity. "The 21½-inch baby weighed next to nothing," said the author. It coiled inside a shell the size of a goose egg.

In their native habitat, Komodo dragons are the largest lizards in the world. Unlike alligators, they never slither across dry land but always rise up on their legs to move. Wrinkled
